7.1 **CHARGING POINTS IN THE CITY**

In response to the following question submitted by Comhairleoir M. Shields, a written reply was circulated as outlined below:-

Would it be possible to draw up a list of suitable sites for more e charging points in the city and to contact the ESB and the Department of Environment with a view to installing these necessary facilities?

(Cllr. Mary Shields)

REPLY

ESB ecars has been responsible for the deployment of the national charging infrastructure. It is understood that their charging network currently comprises of approx 1,000 public charge points across the island of Ireland (including approx 75 fast charge facilities). There are currently nine locations within the current city boundary.

Cork City Council has also installed EV charge points at its own parking facilities including the Black Ash Park and Ride, Paul Street car park and North Main St Multi car park. A review will be undertaken of these premises with a view to the feasibility of the addition of further charge points as part of asset management review.

It is understood that ESB ecars will be rolling out a programme of new charge facilities across the country and will also be upgrading some of its existing charge facilities. There have also been recent reports of emerging plans by private/commercial companies in developing some fast charge points across the country. With the growing numbers of electric vehicles it is anticipated that the provision of charge facilities will expand considerably in the coming years.

The Council will monitor developments in the market and engage with ESB in relation to the details of their plans for the Cork area.

Gerry O'Beirne,
Director of Services,
Roads & Transportation.

7.2 SOUTH EAST STRATEGIC CORRIDOR

The following question submitted by Comhairleoir S. Martin was deferred to the next meeting of An Chomhairle to be held 13th May 2019:-

Under the South East Strategic Corridor as part of the Douglas Cycle Route – how many junction upgrades are being considered on the Front and South Douglas Roads. What junctions will be part of the NTA funded scheme?

(Cllr. Sean Martin)

7.3 WILTON ROAD CORRIDOR PROJECT

In response to the following question submitted by Comhairleoir F. Dennehy, a written reply was circulated as outlined below:-

To ask the C E in relation to the Wilton Road corridor project, is there an overall plan available for viewing, be it a sketch or detailed drawings of the next phase/phases of the project outlining exactly what is involved in the next phase/phases and given the fact that residents will be seriously inconvenienced and will suffer greatly from the loss of gardens and parking facilities in addition to having traffic up to 7mtrs closer to their dwellings, can we give these residents any indication as to when the next phase/phases is likely to begin?

(Cllr. Fergal Dennehy)

REPLY

As Members will be aware the Council has been allocated funding to progress an upgrade of Dennehy's Cross on Wilton Road. The works are required to deliver a much needed improvement in the facilities available for motorists, bus users, cyclists and pedestrians. The proposals also include for retention, upgrade and improved integration of the junction between Wilton Gardens and Wilton Road. Detailed plans and other related documents were placed on public display on 15th March 2019 as part of the Part 8 planning process. Comments and /or submissions on these proposals can be made in the period to 15th May 2019. Issues relating to necessary land acquisition, boundary treatment, parking facilities, landscaping etc will, as with other schemes, be addressed as part of the compensation package to be agreed with any affected land owner. Subject to approval it is expected that the scheme will go forward for pricing/tender later this year.

Proposals for further upgrades along the Wilton Road Corridor can be progressed as funding becomes available to Council. Any such proposals will similarly be discussed with Members and subject to public consultation prior to finalisation. As with other road improvement projects across the City the timing for the design, planning and delivery of further works on the corridor are dependent on the availability of funding and the detail of proposed schemes will be prepared at that stage and finalised on completion of the relevant planning process.

Gerry O'Beirne,
Director of Services,
Roads & Transportation.

In response to the following question submitted by Comhairleoir M. Nugent, a written reply was circulated as outlined below:-

Can the CE update on proposals for a housing development at the rear of Lagan Grove, Mayfield? A number of residents of the estate are experiencing ongoing issues of damage to their properties from anti-social behaviour from a pathway and green areas to the rear of their homes. Are measures being considered to protect the residents in the interim?

(Cllr. Michael Nugent)

REPLY

The City Architects Department is currently at an advanced stage with a design layout for an infill housing scheme at this location. The Housing & Community Directorate facilitated a meeting with local ward members to agree interim measures to mitigate the effects of anti-social behaviour in the vicinity, but an agreed solution, among those in attendance, was not arrived at. Possible interventions and measures discussed included the closing of the pathway and the provision of fencing to protect existing properties. A further meeting will be organised in the near future to progress these matters, with the intention of exploring a route to an agreed solution.

B. Geaney,
Director of Services,
Housing & Community Services.

7.7 **TRAMORE VALLEY PARK**

(Cllr. Terry Shannon)

REPLY

The installation of a 30km/hr speed limit at Castlemeadows on Skehard Road will be assessed for inclusion in the relevant schedule of the Cork City Road Traffic (Special Speed Limits) Bye-Laws.

Subject to Members approval the statutory process to amend the Cork City Road Traffic (Special Speed Limits) Bye-Laws can then be progressed to give effect to the change. 30km/hr special speed limit signage and markings can be installed following adoption of the revised Bye Law.

‘That Cork City would initiate a programme to hire and train apprenticeships to help tackle the urgent shortage of tradespeople in the building sector and that Cork City Council would call on the Minister to also roll out a coordinate programme to tackle the serious shortage of apprenticeships while also reducing youth unemployment.’

(Proposer: Cllr. T. Gould 19/120)

The report of the A/Director of Services stated that Cork City Council is currently examining the feasibility of introducing a 4 year Craft Apprenticeship Programme in 2019.

Discussions have taken place with the Cork Education Training Board (CETB) regarding details of the Programme such as:

- Registration,
- Codes of Practice for Apprentice and Employer,
- Assessor training

There are 7 phases to the Apprentice Training Programme (4 on-the-job & 3 off-the-job). Apprentices are paid by Cork City Council for Phases 1, 3, 5, & 7 and paid by the Cork Education & Training Board for Phases 2, 4 & 6.

Cork City Councils contribution to the Programme would be to provide the on-the-job training and assessment with craft supervision/materials etc. for a number of trades.

Each participating area of the Council will need to provide assessor(s) for the apprentices. The assessor is an experienced and technically qualified person in an occupational area who is responsible for organising and conducting assessments for assigned apprentices. The resources requirement for Apprentices within the City Council is currently being assessed within the operational areas of the Council.

‘That Cork City Council would prepare a full review/implementation report for the Bishopstown and Wilton area action plan in relation to each and every objective and aim of the plan; such a report to include all details of meetings, consultations, site visits, internal reviews, assessments, consultations undertaken with resident groups and developers and other stakeholders. That the report would also details staff time allotted to the oversight of the implementation and delivery of the plan, and expenditure on the implementation and delivery of the plan, and where objectives and aims of the original plan have not been met what action can the City Council undertake to ensure they are achieved.’

(Proposer: Cllr. J. Buttimer 19/396)

‘Can the City Council report if there any plans for the long vacant former Garda Station at MacCurtain St., Cork? If not perhaps the Council could engage the Department of Justice to request that building be gifted or made available to the Council for public use, with a community dividend, in a key area of Cork City for tourism, business and other interests. One proposal could be that the building be an offshoot of the Cork Public Museum during the ‘Decade of Centenaries’ period which would be significant on a street named after former Ard-Mhéara Tomás MacCurtáin.’

(Proposer: Cllr. M. Nugent 19/134)

The report of the Director of Services stated that the property at 58 MacCurtain Street is in the control of the Office of Public Works, having previously been used as a Garda Station. The property has not been in use for a number of years, and some reconfiguration and refurbishment will be required to bring the building back to active use. It is clear that substantial capital and revenue investment will be required. Previously, some private interest was expressed to develop the property for tourism purposes and the City Council engaged with the Office of Public Works in relation to same.

The Property Department has again been in contact with the Office of Public Works requesting that the property would be brought forward for disposal to enable it to be brought back to active use. A further report will issue outlining any progress in this regard.

‘That Cork City Council would request funding from the Fabric Upgrade Scheme for the flats in:-

- (1) Noonan’s Road
- (2) Fort Street
- (3) Dean Street
- (4) St. Finbarr’s Road’

(Proposer: Cllr. S. Martin 18/322)

The report of the Director of Services stated that the Council is in the process of developing its 2020 programme for the Apartment Deep Retrofit Project, which is dependent on SEAI/Government grant funding. The apartment blocks on Noonan Road, St. Finbarr’s Road, Fort Street and Dean Street (9 blocks in total) could be included in the 2020 programme. Such a decision would take up a considerable portion of the 2020 programme – the completion of approximately 15 blocks per year in total is considered feasible in terms of delivery. There would be several advantages to focusing the delivery of this project to one area:

- It would provide a regeneration of the entire area and enhance public and tenant amenity;

- It would provide an opportunity to take a consistent/coherent approach to the area;

- Potential impact on tourism/economic development (St. Finbarr's Cathedral & Elizabeth Fort).

(Proposer: Cllr. T. Brosnan 19/102)

On the proposal of Comhairleoir T. Brosnan, seconded by Comhairleoir T. Gould, a vote was called for the approval of the report of the Director of Services, where there appeared as follows:-

(Proposer: Cllr. S. Martin 18/323)

‘That Cork City Council includes Kilbarry Place on the 2019 resurfacing programme.’

(Proposer: Cllr. K. Collins 19/058)

‘That Cork City would support the residents of Farranlea Park, Model Farm Road, to enable and facilitate Nursery Lane, Model Farm Road to come under the jurisdiction of Cork City Council, hence protecting the residents' access and right of way. It is understood that Nursery Lane, Model Farm Road, given to Cork County Council by the Jennings Estate (1953) was not included in the last boundary expansion of Cork City Council in 1965. The houses on the western side of Farranlea Park have access to Nursery Lane through access gates at the rear of their properties. This allows direct access to the Model Farm Road. This access is a right of way set out in each of the property's Title Deeds (circa1940).

This right of way is registered with the Land Registry, through the property Title Deeds. Due to the recent disposal by Cork County Council of part of Nursery Lane (649 m2) to a private resident of Nursery Lane, Farranlea Park residents are concerned about the remaining portion of Nursery Lane, which remains Cork County Council's property.’

An Chomhairle considered and approved the report of the Director of Services, Roads and Transportation dated 11th April 2019 on the following motion referred to the Committee by an Chomhairle:-

‘I propose that this Council will call for stricter enforcement of speed limits on the Old Youghal Road, particularly the section of the road between St. Joseph’s Church and

Mayfield Village/Tinkers Cross, which I have described as “an accident waiting to happen”. Since the road widens out beyond the church, many drivers have a tendency to put their foot on the accelerator and some were treating the road as a speedway. Not only is this a busy stretch of road, but it is also an access point to a number of schools, and hundreds of children use it daily. In addition, there is a large cohort of elderly citizens in the area. I have had regular reports of people complaining about cars and other vehicles failing to stop at the pedestrian crossings, which are adjacent to schools, shops and homes. I call on the City Council Roads Department to take appropriate measures to enforce the speed limit on the Old Youghal Road, and to ensure that those exceeding the speed limit or failing to obey traffic lights are penalised for this reckless behaviour.’

(Proposer: Cllr. T. Tynan 19/123)

The report of the Director of Services stated that the default speed limit within the City administrative area is 50kph unless signed otherwise.

In recent times Grattan house has been attracting a lot of drug use and anti social behaviour and it has become a sorry site over the years and is blighting the area. Putting Grattan House into good use would offset any further dereliction and enhance the area while at the same time create another tourist attraction within the city centre.’
