<b>Venue Address:</b>	The Showgrounds Curraheen Cork <a href="http://www.corksummershow.com">www.corksummershow.com</a>
<b>Event Type:</b>	Outdoor Agricultural Show and Music & Lifestyle Festival

#### Statement:

It is our responsibility to:

- Ensure compliance with the all regulations pertaining to waste;
- Prepare and submit to Cork City Council's Planning Department a Waste Management Plan 30 days prior to the event.
- Prepare and submit to Cork City Council's Planning Department a Waste Implementation Plan within 28 days of the event being held.

Waste segregation was achieved by providing appropriate, clearly labelled and colour coded waste, recycling and food waste receptacles. All producers/trade stand holders were asked to limit the use of disposable items and packaging where possible to limit waste. All traders/exhibitors were informed of their obligations and the waste management arrangements in place for the duration of the show, including set-up and take down. All producers were required to segregate and manage their own waste.

All sanitary waste (human and animal) was managed in accordance with legislative obligations, particularly in relation to public health and environmental matters.

**Waste Profile:**

	<b>Anticipated Quantity</b>	<b>Actual Quantity</b>
Refuse/General Waste	6 tonnes (6,100kg)	5,720kg
Recyclable Waste	1.5 tonnes (1,524kg)	1,800kg
Animal faeces (soiled straw)	Undetermined as dependent on number of exhibits	None – no bedding under animals
Portaloos Waste	Undetermined as dependent on the number of visitors	6 tonnes
Waste Oils (edible oil and fat):	None	None(all vendors are responsible for disposing of their own waste offsite).

**Waste Collection Facilities:**

All waste generated at the Show was source segregated.

We had cleaning staff on site both days to ensure that wheelie bins were serviced regularly and when nearing capacity removed to the holding area so as not to become a health hazard. Appropriate skips were provided for the disposal of waste with separate skips for general, recyclable and food waste.

All Portaloos emptied and the contents taken off-site.

All waste was collected by authorised collectors and transferred to authorised treatment processing plants.

A road-brush was onsite to minimise the effect of debris (mud) on the public highway but this not used as there was no rain during the event.
